

There are 3 distinct games THAT can be played in parallel. One in each initialization position

① ① ①

① ① ①

① ① ①

Each successive swap, gets applied to every game, let

2

1 2

2 3

	① ① ①	① ① ①	① ① ①
1 2	① ① ①	① ① ①	① ① ①
2 3	① ① ①	① ① ①	① ① ①

There are 3 possible games, so we define a score per possible game

If the initialization were 100 -

then points xxx for three guesses

If the initialization were 010 -

then points yyy for three guesses

.....

	① ① ①	① ① ①	① ① ①
1 2 1	① ① ①	① ① ①	① ① ①
2 3 2	① ① ①	① ① ①	① ① ①

game 1 : 1 pts

game 2 : 0 pts

game 3 : 1 pts

Therefore, max is 1

exact simulation, no further proof necessary
